An adaptive and communicative Information Systems student and fullstack developer with deep expertise in the PHP and Laravel ecosystem. Proven track record in building comprehensive web applications end-to-end — from interface design to backend integration and database management.

WORK EXPERIENCE

BULOG – Jakarta, Indonesia <i>Freelance Frontend Developer (jatimelatibulogtiga.com)</i> <i>Tech Stack: Figma, HTML, CSS, Bootstrap, Tailwind CSS</i> - Built visual interfaces for a community information system live news portal, announcements, and login page with pixel perfect, fully responsive implementation across all devices. - Translated Figma mockups into semantic HTML components, ensuring a smooth handoff to the Laravel backend team for full integration. - Platform remains actively used by the community throughout 2026, supported by a clean and maintainable frontend architecture.	Feb 2026 - Apr 2026
---	---------------------

PROJECTS

IoT Monitoring & AI Decision Support System - Thesis Project <i>Tech Stack: Laravel, RESTful API, Microcontroller, MVC Architecture, MySQL, Chart.js, Python</i> - Designed and built a real-time web platform to monitor temperature & humidity inside an enclosure using a microcontroller and a Laravel backend, with a two way RESTful API for telemetry synchronization. - Implemented an environmental stability assessment engine and an AI-based Decision Support System (DSS) capable of generating, applying, and logging actionable parameter recommendations forming the core research contribution of the thesis.	2026
Sports Venue Rental & Community Management Platform - Internship Project <i>Tech Stack: Laravel, React.js, Inertia.js, Tailwind CSS, SQLite</i> - Designed the complete UI system and developed a sports venue rental and community management web platform during an internship, using a modern monolithic architecture (Laravel + React via Inertia.js) to handle venue scheduling, field availability, and community features. - Implemented multi-role authentication system to differentiate administrator and general user access, alongside a dynamic booking flow and community management module within an MVC based Laravel backend.	2025
E-Commerce Fashion Retail Platform - Team Project <i>Tech Stack: Laravel, Bootstrap, MySQL, Figma</i> - Led end-to-end UI/UX design using Figma and drove frontend implementation within the team, delivering an e-commerce platform with a multi-photo product catalog, variants, and dual interfaces (customer & admin). - Implemented a checkout flow with payment proof upload and an admin panel for real-time order status tracking and payment verification.	2025
Aquarium Rental Platform - Personal Project <i>Tech Stack: Laravel, MySQL, MVC Architecture, Canva</i> Independently designed and built a full-cycle aquarium rental platform from scratch using Laravel, handling UI design, database schema, backend business logic, and frontend implementation within a single development cycle.	2025

EDUCATION

Gunadarma University, Depok Bachelor of Information Systems GPA: 3.62 of 4.00 <i>Thesis: Enclosure Monitoring System with AI Decision Support System using Laravel & ESP32</i>	2022 - 2026 (Expected)
--	------------------------

CERTIFICATIONS

Data Analyst Certification (Competent) — Badan Nasional Sertifikasi Profesi (BNSP)	2026
--	------

ORGANIZATIONAL EXPERIENCE

“HEROES X” — Karang Tengah, West Java <i>Head of Sponsorship - Student Executive Board</i>	2024
--	------

- Led fundraising strategy and sponsor negotiations to fund medical facilities and educational infrastructure in a village-scale community service program.
- Secured financial and logistical support that directly contributed to the success of a population data collection program and the construction of public educational facilities.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful API, MVC Architecture, IoT Integration

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, React.js, Inertia.js, Blade

Database: MySQL, MariaDB, SQLite, Relational Database Design

Design: Figma, Canva

Tools: Git, GitHub, Vite, Composer, npm, Python

LANGUAGES

Indonesian (Native) · English (Active)

ADDITIONAL SKILLS

UI/UX · Pixel-Perfect Implementation · End-to-End Web Development · API Integration

Problem Solving · Team Collaboration · Agile Development
